

LASER LITE®

The hot look in comfortable hearing protection

LASER-LITE (NRR 32) is the multi-color ear plug that workers love to use. The non-irritating, non-allergenic, self-adjusting foam recovers to fit virtually any ear canal.

Our new, secret formula gives *LASER-LITE* an extremely high noise reduction rating without affecting its unsurpassed comfort. And its value remains!

Vivid colors

A multi-color ear plug that workers love to use.

Ideal for smaller ear canals

The unique design of *LASER-LITE* ear plugs rolls extremely small for those users with smaller ear canals.

Non-allergenic

Soft, non-irritating, non-allergenic foam allows for wearer comfort.

NRR 32

This highly rated ear plug blocks out damaging noise.

Disposable Ear Plug fitting instructions

- ▶ Before fitting any ear plugs, make sure your hands are clean.
- 1. Hold the ear plug between your thumb and forefinger. Roll and compress the entire ear plug to a small, crease-free cylinder.
- 2. While still rolling, use your other hand to reach over your head and pull up and back on your outer ear. This straightens the ear canal, making way for a snug fit.
- 3. Insert the ear plug and hold for 20 to 30 seconds. This allows the ear plug to expand and fill your ear canal.
- ▶ **Test the fit.** In a noisy environment, and with earplugs inserted, cup both hands over your ears and release. You should not notice a significant difference in the noise level. If the noise seems to lessen when your hands are cupped over your ears, your ear plugs are probably not fitted properly. Remove and refit following instructions.
- ▶ Always remove ear plugs slowly, twisting them to break the seal. If you remove them too quickly, you could damage your ear drum.
- ▶ Foam ear plugs are disposable and not intended for re-use.

Corded or uncorded

For users who frequently use and remove hearing protection, the corded version of *LASER-LITE* offers greater convenience. They're also more visible to help compliance supervisors ensure that employees are wearing hearing protection.

Packaging options

LASER-LITE ear plugs can be used with the Leight Ear Plug Dispenser, a permanent protection center that is easy to use, and buying ear plugs in bulk means you're not paying for unnecessary packaging. *LASER-LITE* ear plugs are available packed in individual poly bags, and both corded and uncorded styles are available.
